I am a curious self-motivated Front-End Web Developer. My background in sales enables me to be as comfortable speaking with potential clients as well as fellow developers. I have generated a robust front-end portfolio showcasing web apps made with Vanilla JavaScript and React and have recently completed Udacity's Front-End Web Developer Nanodegree. I thrive in positive, team-oriented environments and enjoy having the creative freedom to problem solve, as well as, casting vision and implementing strategic ideas.

Technical Skills

Languages: JavaScript, HTML5, CSS3
Frameworks/Libraries: jQuery, Bootstrap, React
Others: Git/GitHub

Project Experience

NeighborHood Map: React - https://github.com/vronney/react-neighborhood-map   **October 2018**

- Single-page, responsive application built with React.js
- Developed a full-page map that loads 10 popular steakhouses in San Antonio,TX.
- User can view recent picture, location and rating (retrieved by fetch request to FourSquare API).

Arcade-Game-Clone - https://github.com/vronney/Arcade-Game   **July 2018**

- Clone of the classic game, Frogger. Udacity provided the art assets and game engine.
- Coded player, enemies, and other game entities in JavaScript's object-orientation pseudo-classic style
- Created enemy subclasses with different movement patterns and sprites.

Restaurant Review - https://github.com/vronney/mws-restaurant-stage-2   **September 2018**

- Developed a restaurant page displaying a map-box (used Google Maps API of the New York area), images of the restaurants.
- User is able to filter the list of restaurants and have the selections display on the map.
- User is able to click the image for more information with a half-screen map.

Work Experience

FEBRUARY 2017 – PRESENT
Diabetes Therapy Specialist / Medtronic, Inc, San Antonio, TX

- Partner with Territory Manager to exceed performance goals by developing, executing actionable sales plans.
- Spearhead the understanding of problems in assigned territory, outlining the parameters of the annual goals.
- Educate patients on the importance of intensive diabetes management and continuous glucose monitoring for patients with diabetes

AUGUST 2016 – FEBRUARY 2017
Production Team Lead / Toyota - TLS, San Antonio, tx

- Self-directed work responsible for the productive operation of the Vehicle Distribution Center (VDC).
- Performed various Post Production Option (PPO) and Point of Entry (POE) functions with the support of a variety of computerized systems.
- Assisted as a Team Lead in over-seeing 75 workers in assigning workloads, shift set-up for three shifts, and supervision of installations.
